

NKTP PROFILE

NKTP

EST: 2002

WELCOME

Our **OBJECTIVE** is to constantly improve to produce high quality products, creating a perfect interior product for your life with many different lifestyles. We are a manufacturer with our own design team, and can also make according to customers' designs and preferences.

VISION

Bringing high quality products that meet the tastes of all customers. Enhance the competitive position of Vietnamese products in terms of quality, process, price, design, after-sales service...

MISSION

Always innovate, always create. Create valuable products "made in Vietnam"
Company benefits go hand in hand with customer benefits and social values.

QUALITY

Quality for the company is survival and top priority.

Always satisfy all customers, even the most demanding customers.

Both product quality and service quality - Our working motto

HISTORY

- **NKTP** Company was established in 2008, that time we were specializing in manufacturing all kinds of hardware, cabinet handle, kitchen cabinet handle, wood accessories, furniture frames, jewelry trays, etc., especially products that require high technicality from design structure to perfect appearance. Since 2012 we have expand the field of surface treatment to ensure the best quality of our products and control them. And NKTP was professional in the surface treatment processing include: electroplating (Copper, Brass, Nickel, Black Nickel, Chrome, antique painting); Electrostatic waterbase spray painting, Electrophoresis (Electro Coating)
- Even We then expanded the surface treatment processing for major partners such as Samsung, Mitsubishi, Hitachi, Nikkei, Katsura, Condor and other customers in the US, EU, Korea, Japan market. We have the experienced technical and management team. With modern surface treatment production line and large tank size, we can handle the big size product (L2400 x W400 x H800 mm) in our factory. From customer service to product quality, we are always confident to bring customers satisfaction beyond expectations.
- Besides, with enthusiasm for work, love for the profession, and knowledge of products, NKTP company will always learn and innovate to make out the products with the best quality.

PROCESS TO A LUXURIOUS HANDLES

Aluminium Die Casting Machine

Quantities: 3 items

CNC Machine

CNC machines can process any product according to customer needs.

We have a member company:

- Die Casting: Aluminium, Zinc alloy, brass
- Product CNC: Steel, Aluminium, Zinc, Brass
- Anodize: color depend on customer's requirement

Subcontractor:

- Extrusion: brass, aluminium
- Sand Casting: Aluminium, brass
- Steel – Wire, Roll, Plate
- Stainless Steel – 201, 304, 316 – Die Casting, Wax Casting

Zinc Die Casting Machine

Quantities: 3 items

MECHANICAL PROCESSING

3D Bending Machine

Bend all types of pipes up to 10mm diameter with many different shapes

2D Bending Machine

Bend all types of pipes up to 10mm diameter

Stamping Machine System

Stamping of support brackets

Cutting Machine System

Used to cut the material extrusion (alu, brass), the material wire (alu, brass, Steel, SS304,...)

SURFACE TREATMENT PROCESSING

Sand Blasting

Create the product surface with sand effect

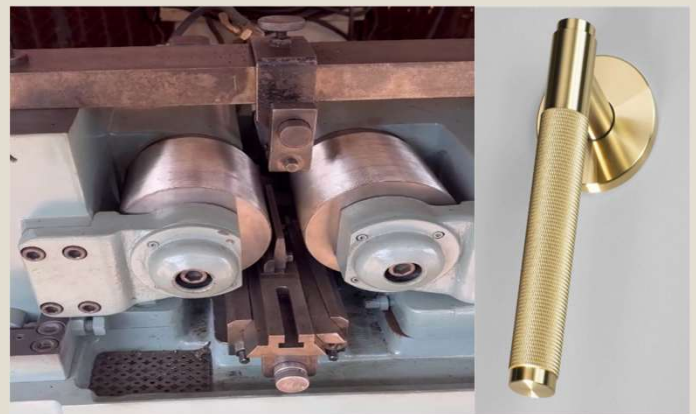

Grinding & Polishing System

Make product surface perfect that meets plating criteria

Drilling & Tapping Machine System

Make the required standard hole in a handles

Thread Rolling Machine

Create beautiful effects on the product surface, for modern designed cabinet handles

PRODUCTS SURFACE FINISH

Electro Plating Automatic Line

Create the perfect metal plating for products from classic to modern, luxury kitchen cabinet handles

L2400 x W400 x H800 mm

Electrophoretic Deposition Coating

Create a black coating or brass color on the furniture accessories surface with the competities price

L3,000 x W1,200 x H1,500 mm

Electrostatic Spray Waterbase Coating

Create products with diverse colors according to customer requirements with extended life

Powder Coating

Application for table and chair frame products, door handles of all kinds

CREAT LOGO, BARCODE

Laser Engraving

Create the logo, slogan on the handles surface, show your own brand for your products

Silk printing machine

Print the logo, barcode,...

Pad printing machine

Print the logo, barcode

Barreling Equipment

Reduces burrs, create the smooth surface

LAB ROOM MACHINE & EQUIPMENT

TEMPERATURE AND HUMIDITY CHAMBER

THERMA SHOCK TEST CHAMBER

GLOSS METER

SPECTROPHOTOMETER

PENCIL HARDNESS TESTER

WATERBATH TESTER

X-RAY TESTER FOR PLATING THICKNESS

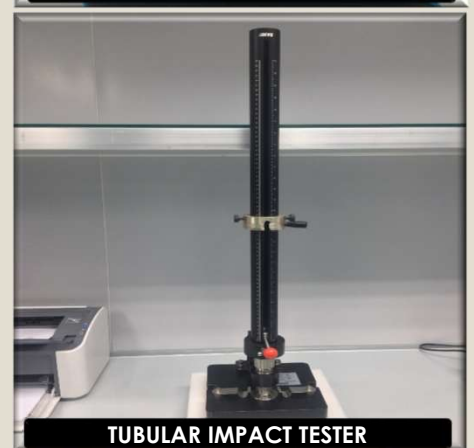

ADHESION TESTER

SALT SPRAY TESTING

COATING THICKNESS GAUGE

TUBULAR IMPACT TESTER
